

Jemin Shrestha

Business Intelligence & Data Analytics Engineer | Barrie, ON | jeminshrestha9@gmail.com

LinkedIn: <https://www.linkedin.com/in/jeminshrestha/> | **Portfolio:** www.jeminshrestha.com.np

PROFESSIONAL SUMMARY

- Business Intelligence and Data Analytics Engineer with 4+ years of experience transforming complex data into actionable insights across retail, finance, and audit domains.
- Skilled in **Power BI**, **SQL**, and **Python** to design analytical dashboards, optimize data models, and automate validation workflows. Experienced in **Snowflake**, **AWS**, and **Azure** environments for scalable ETL and data warehousing.
- Proven track record of improving data quality, driving business decisions, and collaborating with cross-functional teams. Strong background in **AI-driven analytics and predictive modeling** through applied projects with Tarsi Group.

WORK EXPERIENCE

Business Analyst | Cybersecurity Department – Rogers Canada

Jan 2025 – Sept 2025

- Designed Power BI dashboards showing daily threat logs, top vulnerable systems, and incident response timelines, enabling security teams to quickly prioritize critical alerts.
- Extracted and transformed data from multiple sources (AWS CloudTrail, Snowflake security tables, firewall and intrusion detection logs) using SQL and Python, standardizing formats for analysis.
- Analyzed historical security events to identify patterns of false positives and tuned alerting thresholds, improving detection accuracy by 28%.
- Automated weekly and monthly compliance and risk reports by scheduling SQL scripts and integrating outputs into dashboards, reducing manual reporting time by 40%.
- Worked closely with security engineers to map data from IDS/IPS systems, vulnerability scanners, and endpoint monitoring tools into actionable KPIs, providing leadership with insights on trends, high-risk assets, and response performance.

Business Analyst & Analytics Engineer – Tarsi Group

Jan 2024 – Aug 2025

- Led a 4-member cross-functional team of developers and partnered with educators and data scientists to design an AI-powered virtual assistant using GPT models and Grok API, built to help teachers generate rubrics and automate classroom documentation.
- Defined key performance indicators (KPIs) such as rubric generation time, accuracy rate, and teacher engagement; achieved a 35% reduction in manual grading effort through data-driven workflow optimization.
- Built Python- and SQL-based data models to track system performance, user feedback, and content quality, improving model accuracy and reliability.
- Developed interactive Power BI dashboards that visualized usage trends and satisfaction metrics; improved client reporting and decision-making, leading to a 96% user satisfaction score and a 2-month post-project contract extension.

Senior Data Engineer: Audit Partnership

Mar 2023 – Aug 2023

- Implemented end-to-end ELT workflows in Azure Data Factory, Dagster, and PySpark to automate ingestion from 100+ supplier systems (~millions of rows/month), cutting overall processing time by 30% and improving pipeline scheduling reliability.
- Converted static SQL scripts into parameterized stored procedures and designed batch-processing frameworks across distributed SQL Servers, achieving 25–40% faster execution while centralizing data management.
- Migrated SSIS packages to Azure Data Factory with monitoring dashboards, alerts, and error handling, improving production stability.
- Delivered curated data marts and BI-ready datasets for dashboards and reporting, improving audit accuracy and reducing turnaround time.

Data Engineer: Cotiviti

Jul 2021 – Mar 2023

- Optimized mission-critical SQL queries and ETL workflows, cutting runtime by up to **60%** and improving downstream dashboard performance.
- Automated data cleansing and validation using Python/Excel macros, reducing manual effort by **40%**.
- Designed and enhanced complex SQL stored procedures and batch-processing systems, improving error handling, logging, and maintainability.
- Delivered dozens of production SQL queries, performance-tuned for finance and healthcare data warehouses.

Strategy Planning Trainee: Ncell

Feb 2021 – Jul 2021

- Worked with customer and product data to calculate KPIs like ARPU, MO and track traffic trends, building dashboards in Tableau, Power BI, and Excel. Used SQL to analyze and support better business decisions, improving forecasting accuracy by ~20%.

EDUCATION

Institution	Degree/Program	Date	GPA/Honours
Georgian College	Postgraduate in Artificial Intelligence	Sept 2024 – June 2025	GPA 91%
	Postgraduate in Big Data Analytics	Sep 2023 – June 2024	GPA 93%
Softwarica College (Coventry University)	BSc in Computing	Mar 2017 – Jan 2021	Honours First Class

SKILLS

Data Analytics & Visualization:

Power BI, Tableau, DAX, Power Query, Data Storytelling, KPI Design, Dashboard Development, Business Requirements Analysis

Programming & Automation:

Python (Pandas, NumPy, Requests), SQL, T-SQL, Data Validation, Data Transformation, Scripting Automation

Cloud Platforms & Data Warehousing:

Snowflake, AWS (Glue, Redshift, S3), Microsoft Azure (Data Factory, Synapse, Databricks), Google BigQuery

ETL & Data Engineering:

ETL/ELT Development, Data Modeling, Data Quality Monitoring, API Integration, Data Pipeline Design

Database & Querying:

Stored Procedures & Functions, Query Optimization, Dynamic SQL, Data Reconciliation

AI & Advanced Analytics:

GPT Model Integration, Grok API, Machine Learning Pipelines, Text Analytics, Predictive Insights

Business Intelligence & Reporting:

Power BI, Microsoft Fabric, Looker Studio, SSRS, Business Metrics Tracking, Report Automation

Version Control & Collaboration:

Git, GitHub, Azure DevOps, Agile/Scrum Collaboration, Documentation & Stakeholder Communication

CERTIFICATIONS

[Microsoft Fabric Data Engineer - DP700](#) | [HackerRank SQL Advanced](#) | [Google Data Analytics](#)
